

# Bostik 2 Part Flexible

Bostik 2 Part Flexible rapid setting, lightweight, rubber crumb adhesive is formulated to withstand greater deformability and lateral stress than standard cementitious adhesives. It is suitable for most types of tile substrate including more demanding installations, such as steel, GRP epoxy coatings, tile backerboards, dry prepared calcium sulphate based screeds, WBP plywood, chipboard, fibre reinforced sheets, vinyl tiles/sheets, mastic asphalt and other substrates where movement or vibration may occur.

**Ideal for surfaces subject to movement and vibration**

**Sets in 3-4 hours**

**Internal and external**

**Water/frost-resistant**

**High flexural & shear strength**

**Acoustic properties**

**Light weight fillers**

Packaging:

12.5kg bucket, Grey
