

Bostik OPF

Bostik OPF is a non-slip, fibre reinforced polymer enhanced adhesive suitable for adhering porcelain, fully vitrified, glass, stone, marble and ceramic tiles to most standard wall and floor substrates such as dense concrete, cement sand screed, masonry, gypsum plaster, plasterboard, tile backerboards, existing tile bases, vinyl tiles and sheets, dry prepared calcium sulphate based screeds. Bostik OPF is a flexible adhesive and can be used on more demanding bases such as WBP plywood overlay and other substrates subject to limited vibration or movement.

- **Totally non-slip**
- **Internal and external**
- **Extended open and working time**
- **24 Hour set**
- **Very high bond strength incorporates Fibre Technology**
- **Suitable for under floor/tile heating systems**
- **Swimming pool grade**
- **Suitable for use with correctly installed WBP Plywood overlay**
- **Conforms to: BS EN 12004 : C2TE**
