

Bostik Vitri-Flex is a rapid setting adhesive suitable for adhering most non-porous tiles such as porcelain, fully vitrified, natural and artificial stone tiles to most standard wall and floor substrates such as concrete, cement/sand creeds, masonry, sand /cement renders plasterboard, tile backerboards, existing tile bases, dry prepared calcium sulphate based screeds. Bostik Vitri-Flex is ideal for fast track applications as it is sufficiently hard that tiles can be grouted after only 2-3 hours. Bostik Vitri-Flex is a flexible adhesive and can be used on more demanding bases such as WBP plywood overlay and other substrates subject to limited vibration or movement.

- **Sets in 2-3 hours**
- **Internal and external**
- **Suitable for under floor/tile heating systems**
- **Thin and thick bed up to 12mm**
- **Suitable for use with correctly installed WBP Plywood overlay**
- **Conforms to: BS EN 12004 C2FT- Grey**
- **BS EN 12004 C2F- White**

Packaging:

20kg, 10kg Grey & 20kg White
